1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 25-29, drawn to a cornice, classified in class 160, subclass 19.
 - II. Claims 12-18, drawn to a method of using a cornice, classified in class 160, subclass 405.
 - III. Claims 19-24, drawn to a method of manufacturing cornices, classified in class 160, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

Inventions III and II are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. The product claim will be examined along with the process of using since the process for using the product as claimed cannot be practiced with another materially different product. Restriction is proper between said method of making and method of using since the method of manufacture requires manufacturing plurality of components and repeating steps which are not required in the method of use or product as claimed.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
